PURLSAFE
safety film

GRAFFISAFE 100 micron

- Easy to clean scratch-resistant coating shrugs off most spray, paint and pen, just using basic cleaning materials
- Flexible multilaminate construction protects the underlying glass from damage
- Quick-release adhesive allows faster film removal and replacement without leaving sticky residue
- Suitable for glass, mirrors, marble and stainless steel

Graffiti is a depressing and expensive reality of urban life. Vandals can strike wherever there is temptation: glass and mirrors in public transportation systems, such as bus and train terminals, rest rooms, lobbies or shops.
“Tagging” and etched graffiti causes millions of dollars of damage each year, and has a negative impact on the image of neighbourhood and businesses. Experts agree that in order to combat graffiti’s demoralizing effect, it's important for it to be erased as quickly as possible.
Graffisafe™ multilayer super-clear anti-graffiti film is designed to minimize vandalism by helping to protect glass and mirrors from permanent damage: tagging can be removed by simple cleaning, while surface etching and gouging requires only film replacement; the glass itself remains undamaged.

PERFORMANCES

U.V Transmission	1 %
Visible Light Reflection	9 %
Visible Light Transmission	85 %
Total Solar Energy Rejected	19 %
Solar Reflection	9 %
Solar Absorption	14 %
Solar Transmission	77 %
Glare Reduction	N/A
“g” Value (solar heat gain coef.)	0.83%
“u” Value (EN673W/m².°K)	5.70
Emissivity	0.89
Scratch Resistant Coating	✓
